

MTL-SIS 2000

SMART INTEGRATION SYSTEM

MTL-SIS 2000

Smart Integration System is another addition to the wide range of MTI telecommunication products. It monitors and manages the multi payphone sets installed at the same premises. It facilitates the customers as well as the payphone operators by offering the detailed description of dialed numbers, unit price, call duration, unit consumption, day, date, time and current status.

FEATURES

- Four serial ports for data input
 - One Printer port for printing
 - Efficient combination of more than one SIS units with one printer and one printer auto switch
 - 100% Call Datagram Record on payphone display
 - Customizable printed bill
 - Auto print facility
 - Dialing facility while printing
 - Online monitoring of each payphone activity
- Including:
- Number
 - Date/Time
 - Drop Units
 - Balance Units
 - Price
 - Call Category (Local, STD, ISD & H, F, Q)
- Battery back up (Optional)
 - Good looking casing with black base

telecommunication
